Developing an ecosystem in order to improve the Public Transports performance

The RECREATE research project aims to develop a platform, an intelligent and automated ecosystem of applications and services. The platform utilizes advanced technologies, such as GPS devices and an anonymous passenger counting system, which will be piloted on KTEL buses. It provides information, such as the degree of congestion, to improve the travel experience.

Πρόγραμμα
«Κεντρική Μακεδονία 2021-2027»

Διάρκεια:

11/2021 - 02/2025

Συνολικός
προϋπολογισμός:
398.535,48 €

Με τη συγχρηματοδότηση
